

AYA's new three

Vancouver's Claudia Alan Incorporated is debuting three new readers this spring for both women and men. Two new styles for women called Jayden and Kassidy join the collection along with Madison, a unisex style. The collection features First Nations artwork prominently in the designs and a great part about buying from Claudia Alan is that partial proceeds from the sale of every pair are donated to the OneXOne First Nations Nutritious Breakfast Program, which provides a nutritious breakfast for children on school days. AYA readers are scratch resistant and have thin and lightweight aspheric lenses for optimal viewing.
